

LIBERTY®

Niagara's Liberty line is a cost-effective option that saves money for architects, builders, and plumbing specialists who spec new multifamily construction projects. The Liberty line installs quickly, has an extra-large footprint, and uses standard flapper technology that is familiar to plumbers.

Niagara's Liberty products are available in round and elongated bowls, ADA and standard heights, and 10" & 12" rough-in options. At a 1.28 GPF flush volume, the Liberty line clears up to 1,000g and is WaterSense® Certified.
