

NIAGARA WHOLESALE COLLECTION

SERIOUS PLUMBING
FOR SERIOUS PROFESSIONALS

DESIGNED WITH PURPOSE

Niagara is a nationwide leader in water-conservation products. As a vertically integrated manufacturer, we deliver innovative designs and advanced technologies backed by exceptional quality and performance.

Industry-Leading
15-Year Warranty

Designed with Quality Parts:
Fluidmaster® 400A Fill Valve

Powerful, Vacuum-Assist
Stealth Technology®

Exceptional Performance

- Line Carry
- MaP Score
- WaterSense® Certified
- Large Water Spot

Factory Assembled,
Designed to Install with
Speed in 10 Minutes or Under

Extra-Large Footprint,
Great for Renovations

STEALTH TECHNOLOGY®

Available in 0.8, 1.1, and 1.28 GPF

HOW IT WORKS

Before the flush...

- ❶ Water begins to refill the inner chamber and the tank surrounding it.
- ❷ As water fills the inner chamber, it pushes air into an air transfer tube.
- ❸ Air leaves the transfer tube and pressurizes the trapway.
- ❹ Air pressure exerted on the "bowl side" of the trapway creates a larger water surface.

BENEFITS OF STEALTH TECHNOLOGY®

- Extra-Large Water Spot
- Superior Flush Performance - MaP Premium Rated
- Powerful Vacuum-Assist Flush and 360° Wash Cleans Bowl with Every Flush
- Custom 400A Fluidmaster® Fills from the Bottom Up for a Quiet Refill
- Flushes Using As Little As 0.8 GPF Out of Box - No Adjustments Needed

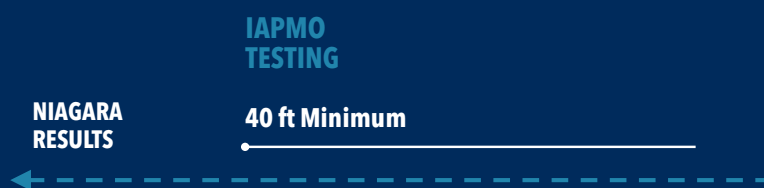

During the flush...

- 1 When the flush button is pressed, water leaving the tank forces water through the openings in the side and front of the bowl rim.
- 2 Water leaves the tank and enters the bowl with high velocity.
- 3 Water flows down through the bowl, thoroughly rinsing the surface.
- 4 As water leaves the inner chamber, it pulls air from the trapway into the transfer tube.
- 5 Air leaving the trapway creates a vacuum, exerting a pull that accelerates the force of water flowing through the trapway.

Exceeds Industry Line Carry Standards

Niagara toilets meet and exceed a 40 ft. minimum standard.

SABRE®

WITH STEALTH TECHNOLOGY®

Using Niagara's Stealth Technology®, the Sabre toilet line is offered in 1.1 and 1.28 GPF. This vacuum-assist technology makes less water work more efficiently to maximize performance.

SABRE®

1.1 GPF WITH STEALTH TECHNOLOGY®

FEATURES & SPECIFICATIONS

- Patented Stealth Technology®
- MaP Score 1,000g
- Upgraded Brass Bolt Set
- 400A Fluidmaster® Fill Valve
- Left and Right Powder-Coated Metal Handles

NIAGARA'S ADVANCED FLAPPER TECHNOLOGY FEATURED IN THE LIBERTY® LINE

Traditional flush technology, with upgraded components for lasting performance.
Niagara takes flapper technology to a new level that puts the needs
of the Pro first, while limiting water waste.

HOW IT WORKS

LIBERTY®

Niagara's entry-level offering uses advanced flapper technology for lasting performance. This line is available with upgraded tank components including an extra-large 3" flapper, a 400A Fluidmaster® fill valve, and brass bolts and cap sets.

Install with confidence knowing that the Liberty is backed by an industry-leading 15-year warranty.

LIBERTY®

1.28 GPF FLAPPER TECHNOLOGY

FEATURES & SPECIFICATIONS

- 3" Flapper
- MaP Score Up to 1,000g
- 400A Fluidmaster® Fill Valve
- Brass Bolts and Cap Set
- Fully Glazed Trapway for Clog-Free Waste Removal
- Left and Right Powder-Coated Metal Handles
- Extra-Large Footprint for Easy Replacement
- Two-Piece Toilet

POWERFUL PRESSURE-ASSIST TECHNOLOGY

FEATURED IN THE BARRON® LINE

Pressure-assist flush technology provides a powerful, dependable flush for jobs that need it most. Designed for light-commercial applications such as hospitality, retail, healthcare, and office buildings, pressure-assist toilets are ideal for high-traffic restrooms.

Pressurized Air Maximizes Flush Performance

As water fills the pressure vessel, air is compressed to 35 PSI, priming the toilet to flush.

More Efficient Toilet for a Cleaner Bowl

Compressed air powerfully pushes water into the bowl and clears waste completely.

Controlled Refill, Consistent Performance

After the flush, water refills into the chamber, re-pressurizing the vessel, priming it for the next flush.

BARRON®

Niagara's Barron products are made for the light-commercial industry, carrying a powerful pressure-assist vessel. The Barron line is offered in 1.0 and 1.28 GPF, round and elongated bowls, as well as a rear-outlet option.

BARRON®

1.0 GPF PRESSURE-ASSIST TOILET

FEATURES & SPECIFICATIONS

- Powerful Pressure-Assist Flush Technology
- Upgraded Brass Bolt Set
- Chrome Left and Right Handle Options
- MaP Score 1,000g
- Extra-Large Water Spot for Clean Bowl
- Fully Glazed Trapway for Easy Waste Removal
